

PROCESS GAS COMPRESSORS

As one of the pioneers in Natural Gas Compression for over a decade, KPCL is the customer preference for Gas Compression products and services. Customers preference is based on KPCL's advance engineering and expertise, experience and services. KPCL offers compression packages and services from various sizes of compression.

[Process gas compressor in Saudi Arabia](#) are Gas Lift and Re-injection, Gathering, Gas Processing, Gas Turbine Fuel Boosting, Transmission and Storage, Floating Production, Storage and Offloading (FPSO).

Codes and Standards followed by KPCL are ASME Code, API Standards, ISO 9001 Compliant, NEC, NACE, Onshore-Offshore.

DOWNSTREAM

High Speed Twin Screw Compressors (API-619)

The Oil injected Twin Screw Compressor is used for process gas applications. Our Screw type Gas Compressors packages are custom made to the suit client's needs.

Oil Flooded Screw Compressor : Howden, UK

Flow range : 100 cfm – 6000 cfm

Driver : Electric Motor

Heat Exchangers : Air Cooled / Water Cooled for Inter-stage Cooling

Compact size

Capacity Control : Stepless

Shaft seal system : Single / Dual

Control panel : Flame Proof / Purge Type

UPSTREAM/MIDSTREAM:

High Speed Reciprocating Gas Compressor Packages (API-11P).

KPCL's engineering and packaging expertise integrated with World renowned gas compressors has provided the industry with one of the most robust, reliable and efficient Gas Compression systems confirming to API 11 P Standards.
